Caroline's
GEMS

FESTIVAL DE CANNES 2026
PRESS RELEASE

CAROLINE'S GEMS :

The alliance of high jewelry and Swiss science in the service of exceptional beauty.

Two women, one shared vision of beauty, excellence, and authenticity. With Caroline's Gems, Caroline Scheufele and Dr. Pauline Burgener present an exclusive collaboration that transcends the traditional codes of luxury skincare.

Born from a sincere friendship and a shared fascination for precious stones and refined beauty rituals, this collection combines gemstone-inspired active ingredients with the precision of advanced Swiss cosmetics. Each formula has been designed to reveal a skin that is more radiant, regenerated, hydrated, and nourished. Each treatment is enriched with a precious olfactory signature developed around the fragrance world of Chopard.

Developed after several years of research within our Dr Burgener Switzerland Laboratory, the collection embodies more than 50 years of family innovation, blending science, technology, and nature in a personalized approach to beauty.

A SKINCARE COLLECTION INSPIRED BY JEWELRY.

Chopard Diamond Glow Treatment by Dr Burgener Switzerland :

The boundary between beauty treatment
and skin longevity is crossed.

An exceptional 40-minute ritual designed to enhance the skin before walking the Red Carpet. An immediate glow, a profound transformation.

The ritual begins with an LPG Endermology session, which reactivates fibroblasts and stimulates collagen and elastin synthesis. It activates circulation and oxygenates the tissues. Facial features are instantly smoothed, signs of fatigue diminished, and the skin regains glow and radiance.

CryoLED therapy (cold infusion) promotes the infusion of exclusive active ingredients – Diamond powder, Blue Exosomes, natural Retinol-like ingredients, collagen, and hyaluronic acid – for a skin that is instantly smoother, brighter, and more even.

A mask concentrated in collagen and hyaluronic acid intensely plumps the skin, while the Diamond Glow Face Serum enriched with diamond powder reveals a sophisticated, multidimensional glow.

At the heart of the treatment, Blue Exosomes combined with Moghol Jasmine Stem Cells and Retinol-Like active ingredients stimulate mitochondrial energy and skin regeneration mechanisms.

Finally, red LED photobiomodulation stimulates mitochondrial activity and enhances the effectiveness of the active ingredients for visible results extending far beyond the Red Carpet.

**RESULT: A SKIN THAT IS IMMEDIATELY MORE RADIANT, SMOOTHER,
DENSER, AND INTENSELY LUMINOUS – READY FOR THE SPOTLIGHT.**

DIAMOND GLOW FACE SERUM

Launched during the 2026 Cannes Film Festival, the Diamond Glow Face Serum, inspired by the timeless brilliance of diamonds and the gardens of Jaipur, combines Diamond powder, blue Exosomes, biomimetic peptides, and natural “retinol-like” active ingredients for comprehensive anti-aging action and intense radiance.

OLFACTORY SIGNATURE:
JASMIN MOGHOL BY CHOPARD

Une ode aux nuits indiennes,
inspirée des jardins majestueux de Jaipur.

ROSE DE CAROLINE FACE SERUM

A high-performance concentrate, the Rose de Caroline Face Serum combines Amethyst powder, Damascus Rose plant stem cells, marine filler, and a complex of multi-molecular-weight hyaluronic acids.

This serum offers skin relaxation, deep regeneration, and complete hydration at every level of the epidermis.

OLFACTORY SIGNATURE :
ROSE DE CAROLINE BY CHOPARD

A sumptuous and ethical Bulgarian Rose absolute, more precious than Gold — a true tribute to the living beauty of nature.

ROSE DE CAROLINE FACE CREAM

A true regeneration ritual, the Rose de Caroline Face Cream combines a peptide-and-gold complex, marine filler, hyaluronic acid, and nourishing jojoba and apricot oils.

The formula works on immediate radiance, collagen synthesis, wrinkle filling, and strengthening the skin barrier.

OLFACTORY SIGNATURE :
ROSE DE CAROLINE BY CHOPARD

A sumptuous and ethical Bulgarian Rose absolute, more precious than Gold — a true tribute to the living beauty of nature.
